These are two islands still untouched by tourism, that constitute the destination of **Bequia**'s fishermen who access them with some difficulties and only when the meteorological conditions are favourable. Uncontaminated coral reefs are scattered everywhere.

Landing Bay and **North Bay** are both located in the island of **Baliceaux** and are the most suitable inlets for the tourist who is looking for still wild places.

They are outside the usual cruising routes on **rented catamarans** in the **Antilles** and **Grenadines** .
